The provider network platform bridging the gap between providers and payer operations

Provider operations, your way

Transform provider operations with a provider network management platform that dramatically improves established workflows to reduce the time you spend on administrative tasks, decrease turnaround times, and improve provider satisfaction when credentialing existing and new networks.

By reducing the operational and administrative burden, you can increase satisfaction and efficiency—for both your team and providers.

Fortify existing workflows through nearly real-time automated PSVs

Reduce manual verifications, enable data continuity, and utilize on-demand verification requests to scale your network and manage your ever-evolving provider directories with greater efficiency, frequency, and reliability. Leverage configurable integrations with dozens of key PSV endpoints to ensure the provider data you request is accessible, accurate, and usable by the teams that need it most.

Solve credentialing challenges with a partner you can trust

Optimize your network with self-serve credentialing solutions powered by PSV automation or utilize our CVO services that encompass everything from provider onboarding to committee management to reduce administrative burden, turnaround times, and costs.

Get peace of mind with real-time, ongoing monitoring

Ensure your providers remain compliant with around-the-clock license and certifications monitoring. Receive automated alerts any time there is a change in status—including sanctions and disciplinary actions.

Track how your providers are progressing toward their continuing education requirements

View requirements by profession and state, track required CEs, manage cross-state CEs, and more.

250,000 administrative hours saved

3 days

average credentialing file turnaround time

2.5x faster

PSVs when switching to an API

About Medallion

Medallion is the first solution for healthcare companies to transform provider operations in one modern platform. Its comprehensive product suite includes cross-state licensing, license renewal, continuing education (CE) tracking, payer enrollment, primary source verifications, self-serve credentialing, CVO credentialing, ongoing monitoring, and more.
