

# Predictive & Real-Time Hour-by-Hour Healthcare Staffing

*Easily Integrates with Most Staff Scheduling Systems*

Current and  
upcoming staffing  
imbalances,  
solved.

With plenty of  
time to spare.

Issio combats understaffing with real-time and predictive, NHPPD-based, patient capacity guidance and float-pooling across your entire health system. Our Patient Capacity Dashboards and data analytics easily identify and solve both immediate and long-term, system-wide staffing issues. Our award-winning platform is already helping other healthcare systems solve staffing issues, improve staff morale and retention, and enhance patient care.

## Scheduling Guidance

- Custom views
- Float Pooling
- Long-term and daily views
- One-click planning and weekly templates
- Schedule sync

## Analytics & Productivity

- Operational readiness
- Real-time staffing alerts
- Direct and indirect care hours optimization
- Meet NHPPD requirements

## Data Visualization

- Benchmarking
- Briefing reports
- Excess hours and budget tracking
- Unit-by-unit and system-wide views

## Predictive Functionality

- Hour-by-hour patient capacity guidance
- Real-time, system-wide staffing alert dashboards and electronic whiteboards

## Easy Setup

- Rapid and fully-remote installation
- Configurable leadership tools
- Accessible anywhere
- Integrates easily to work in conjunction with many current healthcare staffing systems.

*“I don't know how our facilities could have survived this staffing crisis without Issio”*
